Denti-Cal

California Medi-Cal Dental Program

Dear Medi-Cal Member,

If you or your child is enrolled in Medi-Cal, you may have dental services covered through the Medi-Cal Dental Program (Denti-Cal).

Oral health is an important part of health for your whole body! Everyone should have a dental exam at least once every year. The dentist may recommend a different time for you or your child.

- **It's never too early for dental care.** Your child's baby teeth can affect the health of adult teeth.

- **Stop cavities.** See your dentist for exams, cleanings, and dental services that can prevent decay.

- **Ensure a healthy body.** Having healthy gums can lower the chance of developing other medical problems.

Please call the Denti-Cal Customer Service Line at **1-800-322-6384**. We are open Monday through Friday 8:00 AM to 5:00 PM. We can help you with:

- Finding a dentist.
- Scheduling a dental appointment.
- Finding out more about your dental benefits.
- Answering questions about the Denti-Cal Program.
- Getting information on fraud and abuse.
- Getting information on resolving problems with dental care.

Be sure to mention this letter when you call.

You may also visit www.denti-cal.ca.gov for information about Denti-Cal.

Sincerely,

Department of Health Care Services
